International Import Export System advantages

- **Web based system – nothing to install** ✓

- **Links with national systems (e.g. NDS, using XML or web services)** ✓

- **Bridges between countries - electronically** ✓

- **Automatic scheduling for XML data exchange possible – system communicate electronically** ✓

- **No redundant data entry (retyping of import information in an export authorization)** ✓

International Import Export System
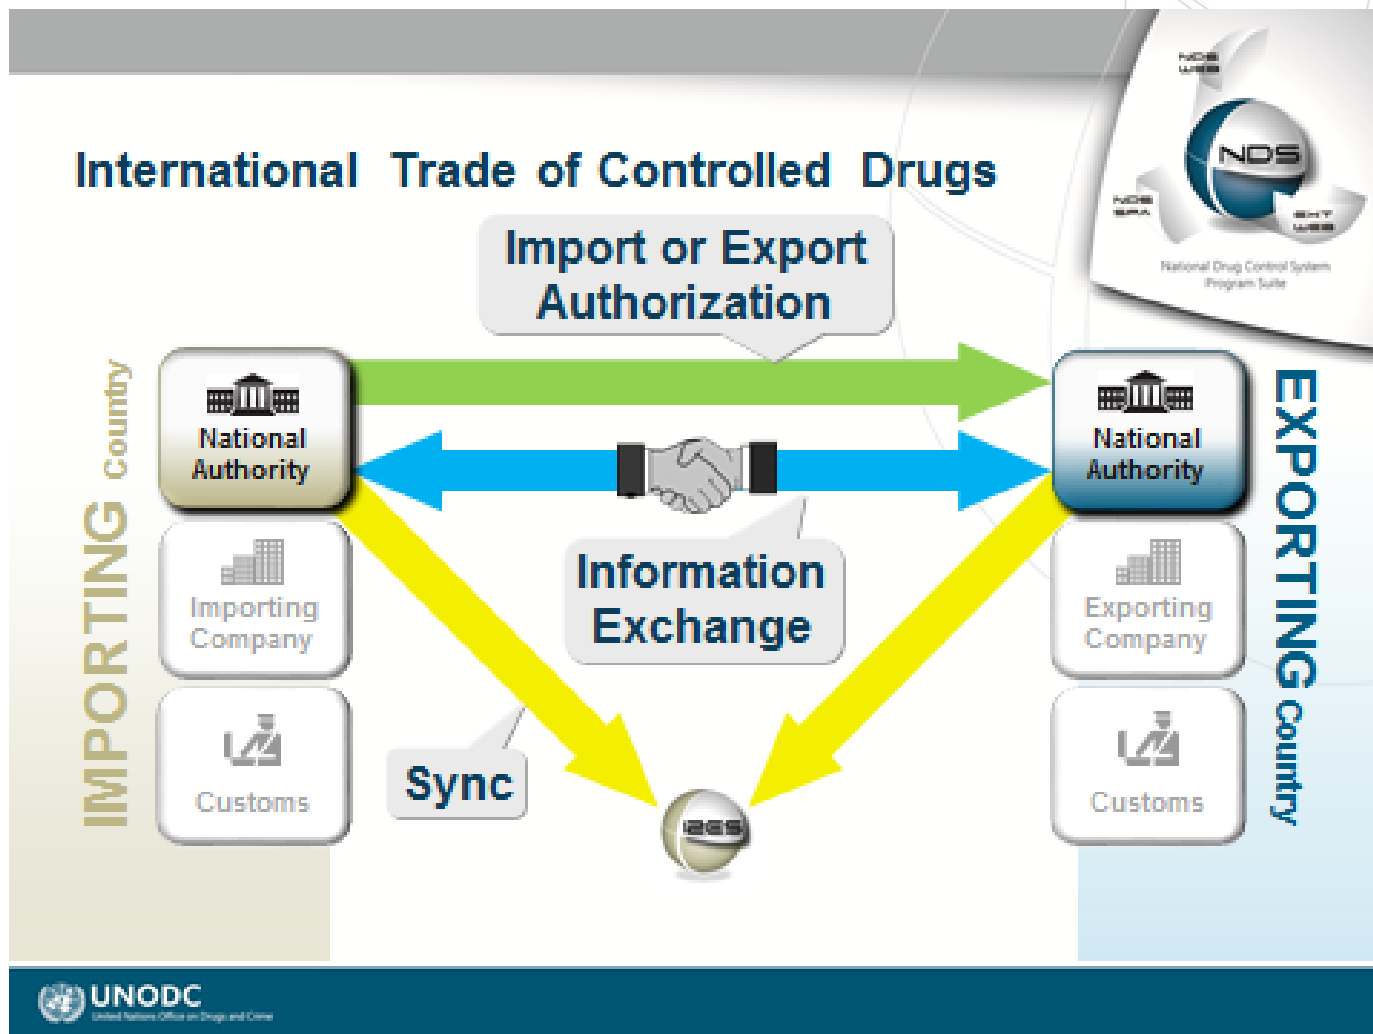

International Import Export System advantages

- **Fully electronic import / export workflow** ✓

- **Real time operation** ✓

- **Supports batch XML processing** ✓

- **Issuing of paper authorizations supported** ✓

- **Access for e.g. customs and law enforcement optional** ✓

- **SSL security** ✓

International Import Export System advantages

International Import Export System advantages

- **Flagging consignments for re-export** ✓

- **Estimate / assessment checking** ✓

- **Development of I2ES completed 2015 - active usage** ✓

- **Enhancement of I2ES to NDS bidirectional automated data exchange completed 2016, including NDS analysis and discrepancy / matching reports** ✓

- **Funding - ongoing maintenance, features not in phase 1(national controlled substances, auto update of substance master, translation…)**

Thank You!
