International Import and Export Authorization System (I2ES) for narcotic drugs and psychotropic substances

I2ES is a new online platform developed by INCB with the support of UNODC to facilitate and speed up the process of issuing import and export authorizations for narcotic drugs and psychotropic substances by competent national authorities (CNAs) of importing and exporting countries in compliance with the international drug control treaties. I2ES allows CNAs to verify the authenticity of such authorizations and to issue endorsements of export authorizations in a secure way and in real time.

In its initial phase, I2ES will allow information exchange on applications by companies for, and issuance by CNAs of, import and export authorizations for narcotic drugs and psychotropic substances, as well as electronic generation of import and export authorizations in paper form.

It is envisaged that at a later stage, I2ES will allow full electronic generation, issuance and exchange of import and export authorizations for narcotic drugs and psychotropic substances.

International Import Export System (I2ES)

The International Import Export System (I2ES) is an international import and export authorization system that uses an online platform developed in 2015 by the **International Narcotic Control Board (INCB)** with the support of the United Nations Office on Drugs and Crime (UNODC).

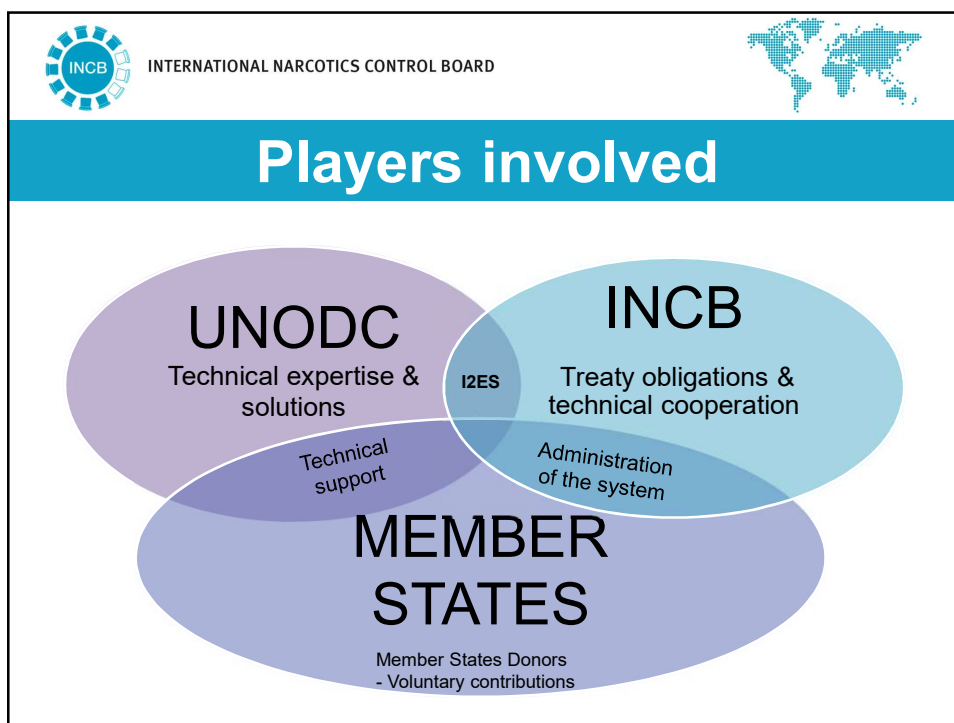

I2ES is an online platform developed to facilitate and speed up the process of issuing import and export authorizations for narcotic drugs and psychotropic substances by competent national authorities (CNAs) of importing and exporting countries in compliance with the international drug control treaties. I2ES will allow CNAs to verify the authenticity of such authorizations and to issue endorsements of export authorizations in a secure way and in real time.

In its initial phase, I2ES will allow information exchange on applications by companies for, and issuance by CNAs of, import and export authorizations for narcotic drugs and psychotropic substances, as well as electronic generation of import and export authorizations in paper form.

It is envisaged that at a later stage, I2ES will allow full electronic generation, issuance and exchange of import and export authorizations for narcotic drugs and psychotropic substances.

Why are you not using I2ES?

- Availability questionnaire (130 replies)
- 63 countries have no national systems
- Not aware of the functionalities
- How can I2ES help?
- Too expensive to use
- I'd join only when it is beneficial for ME
