

FORM D

United Nations Convention against Illicit Traffic In Narcotic Drugs and Psychotropic Substances of 1988

ANNUAL INFORMATION ON SUBSTANCES FREQUENTLY USED IN THE ILLICIT MANUFACTURE OF NARCOTIC DRUGS AND PSYCHOTROPIC SUBSTANCES*

REFERENCES

United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances of 1988: article 12, paragraph 12

Economic and Social Council resolution 1995/20

Country or Territory:		Date:			
Competent authority (for article					
12 of the 1988 Convention) that					
completed the present report					
including address:					
Title or function:		Fax:			
Responsible officer's name:		Email:			
Telephone number(s):		Signature:			
This information relates to the calendar year 20					

Please fill in the form carefully and complete it in a clear manner, including the information requested in this and the following page.

Please consider using the Microsoft Excel version of this form, available on the INCB website.*

The present form should be completed as soon as possible and transmitted, <u>in a single copy</u>, by 30 April and no later than 30 June of the year following the year to which the data relate, to:

International Narcotics Control Board Vienna International Centre P.O. Box 500 1400 Vienna, Austria

E-mail: incb.precursors@un.org Telephone: (+43-1) 26060-4151 Facsimile: (+43-1) 26060-5930 Website: http://www.incb.org

Information about the scope and format of data provided in this form

INSTRUCTIONS

(to be read carefully before completing the form)

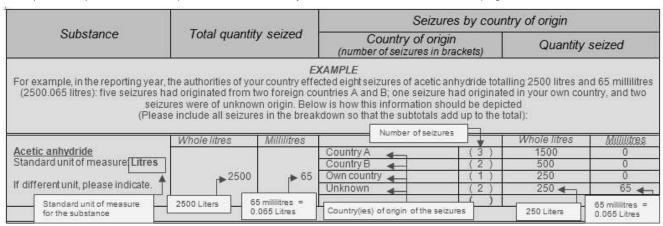

1. Form D consists of three parts:

<u>Part One</u>. Annual information on seizures of substances in Tables I and II of the 1988 Convention and of non-scheduled substances not currently included in Tables I or II; as well as information on methods of diversion and illicit manufacture, stopped shipments and thefts involving these substances

<u>Part Two</u>. Annual information on imports, exports and licit uses and needs (annual legitimate requirements) of substances included in Tables I and II of the 1988 Convention.

<u>Part Three</u>. Competent national authorities empowered to regulate or enforce national controls over precursors and essential chemicals in accordance with the provisions of article 12 of the United Nations Convention against **Illicit** Traffic in Narcotic Drugs and Psychotropic Substances of 1988

- 2. Form D should be completed by the competent authority for article 12 of the 1988 Convention and should be returned as a <u>single</u>, <u>consolidated copy</u> incorporating <u>all</u> information from all relevant agencies for the country or territory in question. Form D should be submitted to INCB by <u>30 April</u> and not later than 30 June of the year following the year to which the annual information relates. Any relevant national reports should be attached, as needed. Note that the licit needs (annual legitimate requirements) relate to calendar years and remain valid until a new estimate is received.
- 3. All precursors and chemicals frequently used in the illicit manufacture of narcotic drugs and psychotropic substances under international control are included in the annex to Form D ("Red List"), which is distributed to Governments annually by the International Narcotics Control Board (INCB) and is available at: http://www.incb.org/incb/en/precursors/Red_Forms/red-list.html. Substances not included in the Tables of the 1988 Convention but for which substantial information exists of their use in illicit drug manufacture are included in the Limited International Special Surveillance List (ISSL), which itself is part of the Information Package on the Control of Precursors, available for use by competent regulatory and law enforcement authorities on the Board's secure web page (https://www.incb.org/incb/en/precursors/cna.html) and on request.
- 4. The statistical data entered in the form should be expressed in the <u>standard unit of measure (volume or weight)</u> indicated for each substance and detailed in the example below. Please also include seizures originating in your own country and seizures of unknown origin. Do not use 1000 separators (, or .) and separate whole units from fractions of units (decimals) in the columns provided. If necessary, use the conversion factors on page 4.

- 5. All figures should reflect the <u>net quantity</u> involved, that is, not including the weight of packages or containers. <u>For preparations</u> (e.g. preparations containing ephedrine or pseudoephedrine), figures should refer to the pure content of the respective substance, i.e. excluding the weight of any other substance that may be combined or mixed with it and excluding the weight of packages or containers. As a minimum, please indicate where a figure refers to the bulk weight of the preparation.
- 6. Where information is not available in any field, always indicate "unknown" or "not available"; where figures are zero (reflecting no seizures or trade), always indicate "none" or "zero". Where applicable, please specify where the information should be treated confidentially.
- 7. If during the reporting year no seizure, no import and no export of any precursor or non-scheduled substance has been effected, Form D should be returned to the Board with a clear indication to that effect in the space for remarks provided on page 2.

Please note: specific instructions are included in the relevant parts of the present form.

CONVERSION FACTORS

To allow for proper comparison of collected information it is important that all data are collated in a standardized format. To simplify the necessary standardization process, figures should be given in grams or kilograms where the substance is a solid, and in litres where the substance (or its most

HARMONIZED SYSTEM (HS) CODES

To facilitate the collection of information from trade statistics, the Harmonized System (HS) codes of the World Customs Organization are given below (Note: other chemical names, synonyms, trade names etc. could be found in the Red List at the Board's web page at: https://www.incb.org/incb/en/precursors/Red_Forms/red-list.html):

Substance	HS code	Substance	HS code

- If necessary, use the conversion factors on page 4.
- Country of origin refers to the country where the seized substance is known, or suspected, to have been diverted or illicitly manufactured. Include your own country, where applicable. In cases where the origin is not known, please classify under "unknown".
- Figures included in this form should reflect the net quantity involved, that is, not including the weight of packages or containers. For preparations (e.g. preparations containing ephedrine or pseudoephedrine), figures should refer to the pure content of the respective substance, i.e. excluding the weight of any other substance that may be combined or mixed with it and excluding the weight of packages or containers.

 ANPP and NPP were included into Table I of the 1988 Convention effective 18 October 2017.
- 1-boc-4-AP, 4-AP and norfentanyl were included into Table I of the 1988 Convention effective 23 November 2022.
- 3,4-MDP-2-P methyl glycidate, 3,4-MDP-2-P methyl glycidic acid and APAA were included into Table I of the 1988 Convention effective 19 November 2019.
- MAPA was included in Table I of the 1988 Convention effective 3 November 2020.
- APAAN was included into Table I of the 1988 Convention effective 6 October 2014.
- To include safrole in the form of safrole-rich oils.

* * * * *

Please provide additional details related to seizures of Table II and Table II substances in the field below, such as Precursors Incident Communication System (PICS) reference numbers for significant seizures. Add additional pages if more space is necessary.

REMARKS	

SUBSTANCES NOT INCLUDED IN TABLES I OR II IDENTIFIED AS HAVING BEEN USED IN ILLICIT MANUFACTURE

Please supply detailed information on substances not included in Tables I or II which were identified as having been used in or intended for illicit manufacture of drugs or precursors. Available information to be brought to the attention of the Board may include:

Please fill one form (table) per substa	ance, continue on	separate sheet(s) if necessary.	
NAME of the SUBSTANCE not included in Tables I or II:				
Total quantity seized:	Whole units	Decimals	Unit of measure (kg, It, ml, etc.)	No. of incidents
Number of seizures/incidents and quantity, by country of origin; Country(ies) of transit (where applicable) and destination, where different from reporting country		1		,

METHODS OF DIVERSION AND ILLICIT MANUFACTURE

A. Methods of diversion and illicit manufacture

Please supply detailed information on methods of diversion and illicit manufacture, particularly in relation to, where appropriate, the more significant cases reported on pages 5 to 11 (i.e. cases involving seizures of substance scheduled in Tables I and II, and cases involving seizures/incidents of substances not scheduled in Table I or II but identified as having been used in illicit manufacture). To the extent possible, include also information about illicit manufacture of substances scheduled in Table I and II of the 1988 Convention from non-scheduled pre-precursor chemicals.

Please fill one form (table) per case, continue on separate sheet(s) if necessary.							
NAME of the SUBSTANCE:							
Was the seized substance actually intended for illicit manufacture of drugs? (e.g., a seizure might have been effected because of lack of a valid import permit, but subsequent investigations might have shown that the substance was being imported for legitimate purposes)	Yes	No					
Circumstances and place(s) of seizure (e.g. illicit laboratories, warehouses, customs area, etc.):							
The name of the drug(s) or precursor(s) that was/were intended to be illicitly manufactured using the substance seized:							
The volume and extent of the illicit manufacture of the above drug(s) or precursor(s):							
Details of the method(s) of illicit manufacture:							
Country(ies) of origin, transit (where applicable) and destination, where different from reporting country:							
NAME of the SUBSTANCE:

B. Information on stopped shipments

Parties are obliged under article 12, paragraph 9, to notify, as soon as possible, the competent authorities and services of the Parties concerned if there is reason to believe that the import, export or transit of a substance in Table I or Table II is destined for the illicit manufacture of narcotic drugs or psychotropic substances. Information on shipments that have been stopped because of sufficient evidence that the substance may be diverted into illicit channels, is essential to overview trafficking trends, and to prevent attempts to divert the substances from other sources. Count ries are therefore requested to provide relevant information on stopped shipments of substances scheduled in Tables I and II and of non-scheduled substances. Where applicable, include information on thefts of these substances.

Information related to stopped shipments or thefts may include, in particular:

B.1. STOPPED SHIPMENTS

B.1. STOPPED SHIPME	I

* * * * *

Please provide additional details related to stopped shipments and thefts in the field below, such as pre-export notification (PEN) reference numbers or Precursors Incident Communication System (PICS) incident numbers for significant cases and any other information that might help to prevent attempts to divert the substances from other sources. Add additional pages if more space is necessary.

REMARKS	

Part Two

ANNUAL INFORMATION ON LICIT TRADE IN, AND USE OF, SUBSTANCES LISTED IN TABLE I AND II OF THE 1988 CONVENTION

A. Licit trade

This information is requested on a voluntary basis in accordance with resolution 1995/20 of the Economic and Social Council, which, inter alia:

"Urges Governments... to inform the Board on a regular basis, upon request of the Board and in the form and manner provided for by it, of the quantities of **substances listed in Table I** of the 1988 Convention that they have imported, exported or transhipped, and encourages them to estimate their annual licit needs" (paragraph 8);

"Requests the Board ... to collect information pursuant to paragraph 8 above, and to further develop and strengthen its database in order to assist Governments in preventing diversion of substances listed in Table I of the 1988 Convention ..." (paragraph 9).

"Encourages Governments to consider strengthening, where necessary, the working mechanisms to prevent diversion of **substances listed in Table II** of the 1988 Convention, as described in the present resolution" (paragraph 13).

Where Governments wish to strengthen existing mechanisms to prevent diversion of **Table II substances**, it is important that they also collect information on the licit trade in, and use of, those substances. The Governments concerned are invited to submit to the Board available information on such licit trade and use, in order to enable it to assist Governments further in preventing diversion of such substances.

B. Licit uses and needs (annual legitimate requirements)

This information is requested on a voluntary basis in accordance with ECOSOC resolution 1995/20 as above, and resolution 49/3 of the Commission on Narcotic Drugs (CND), which, inter alia:

"Requests Member States to provide to the International Narcotics Control Board annual estimates of their legitimate requirements for 3,4-methylenedioxyphenyl-2-propanone, pseudoephedrine, ephedrine and 1-phenyl-2-propanone and, to the extent possible, estimated requirements for imports of preparations containing those substances that can be easily used or recovered by readily applicable means" (paragraph 1)

INSTRUCTIONS

- 1. For licit trade (parts A.1 and A.2), please include the amounts which were actually imported or exported and not the amounts that were initially authorized or planned to be imported/exported (e.g., amounts indicated in pre-export notifications). Attach extra pages if more space is needed.
- 2. For licit uses and needs (annual legitimate requirements) (parts B.1 and B.2), please indicate only quantities to be imported. Those quantities will provide an indication to competent authorities of exporting countries about the legitimate needs of the said substances in the importing countries. Quantities submitted pursuant to CND resolution 49/3 are available on the INCB website. They relate to calendar years and remain valid until a new estimate is received.
- 3. If unable to provide data in detail, please provide partial information as far as possible, noting that the information is incomplete. Where appropriate, please indicate "zero" or "none" (no trade has taken place, or there is no current licit use or need), or "unknown".
- 4. Please specify on page 2 if licit trade data should not be treated confidentially.

A.1. Licit trade: Substances in Table I

		Imports	;	Exports			
Substance ^a	Quantity	y*	Country(ies) of origin**	/(ies) of Quantity*		Country(ies) of destination	
For example, in the reporting (2500.065 litres) and 100000	year, the authorities litres, respectively, a	nd exported a	EXAMPLE tic anhydride from cou an amount of 500 litres a mation should be depi	nd 500 millilitres (50	ounts of 2500 0.5 litres) to c	litres and 65 millilitres ountry C. Below is how

Form D

		Imports			Exports			
Substanceª	Quantity	*	Country(ies) of origin	Quantity*		Country(ies) of destination		
	Whole kilograms	Grams	Country of origin**	Whole kilograms	Grams	Country of destination		
Pseudoephedrine raw material ^a								
Standard unit of measure: Kilograms								
If different unit, please indicate								
	Whole kilograms	Grams	Country of origin**	Whole kilograms	Grams	Country of destination		
Pseudoephedrine preparations ^a Standard unit of measure:								
Kilograms If different unit, please indicate.								
	Whole litres	Millilitres	Country of origin**	Whole litres	Millilitres	Country of destination		
Safrole ⁹								
Standard unit of measure: Litres								
If different unit, please indicate.								

- If necessary, use the conversion factors on page 4.
- Country of origin refers to the country from which the consignment was imported (i.e. the exporting country).
- Figures included in this form should reflect the net quantity involved, that is, not including the weight of packages or containers. For preparations (e.g. preparations containing ephedrine or pseudoephedrine), figures should refer to the pure content of the respective substance, i.e. excluding the weight of any other substance that may be combined or mixed with it and excluding the weight of packages or containers. If exact quantity by country(ies) of origin/destination is not available, please provide approximate total quantity. ANPP and NPP were included into Table I of the 1988 Convention effective 18 October 2017.
- 1-boc-4-AP, 4-AP and norfentanyl were included into Table I of the 1988 Convention effective 23 November 2022.
- 3,4-MDP-2-P methyl glycidate, 3,4-MDP-2-P methyl glycidic acid and APAA were included into Table I of the 1988 Convention effective 19 November 2019.
- MAPA was included in Table 1 of the 1988 Convention effective 3 November 2020.
- APAAN was included into Table I of the 1988 Convention effective 6 October 2014. To include safrole in the form of safrole-rich oils.

If different unit, please indicate.						

If necessary, use the conversion factors on page 4. Country of origin refers to the country from which the consignment was imported. Figures included in this formshould reflect the net quantity involved, that is, not including the weight of packages or containers. If exact quantity by country(ies) of origin/destination is not available, please provide approximate total quantity. The salts of hydrochloric acid and sulphuric acid are specifically excluded from Table II.

Please list for what licit purposes are Table I substances used in your country/territory and what are the estimated annual requirements (quantity) to be **imported**, to provide an indication of your needs to competent authorities of exporting countries.
