Explanatory notes

The boundaries and names shown and the designations used on the maps in this publication do not imply official endorsement or acceptance by the United Nations.

The designations employed and the presentation of the material in this publication do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Countries and areas are referred to by the names that were in official use at the time the relevant data were collected.

Multiple Government sources of data were used to generate the present report, including the information provided each year on form D (information on substances frequently used in the illicit manufacture of narcotic drugs and psychotropic substances), notifications via the Pre-Export Notification Online (PEN Online), the Precursors Incident Communication System (PICS) and other official communications with competent national authorities. Unless otherwise specified, form D data are reported by the calendar year, the cut-off date for reporting being 30 June of the following year. The reporting period for data from the PEN Online system and PICS are from 1 November 2013 to 1 November 2014, unless otherwise specified. In cases in which PEN Online data are used for multiple years, calendar years are used. Additional information was also provided through international and regional partner organizations, as indicated in the report.

Charts and tables that summarize information on the origin of precursor seizures are based only on those form D reports which included a complete breakdown of all precursor seizures by origin.

References to "tons" are to metric tons, unless otherwise stated.

The following abbreviations have been used in the present report:

alpha-phenylacetoacetonitrile
gamma-butyrolactone
gamma-hydroxybutyric acid
International Narcotics Control Board
International Criminal Police Organization
3,4-methylenedioxymethamphetamine
3,4-methylenedioxyphenyl-2-propanone
1-phenyl-2-propanone
Pre-Export Notification Online
Precursors Incident Communication System
