

**ANNUAL STATISTICAL REPORT ON SUBSTANCES LISTED IN THE
CONVENTION ON PSYCHOTROPIC SUBSTANCES OF 1971**

to be furnished to the International Narcotics Control Board (INCB) pursuant to Convention on
Psychotropic Substances of 1971: articles 1, 2, 3, 12 and 16

Resolution I of the United Nations Conference for the Adoption of a Protocol on Psychotropic Substances, Economic
and Social Council resolutions 1576 (L), 1985/15, 1987/30 and Commission on Narcotic Drugs resolution 54/6

Country or Territory:		Date:

Signature:		Calendar year:	

**CHANGES IN THE REPORTING OF TETRAHYDROCANNABINOL AND ITS ISOMERS
AND *delta*-9-TETRAHYDROCANNABINOL**

Statistical information should include quantities of tetrahydrocannabinol (THC) and its isomers
and *delta*-9-tetrahydrocannabinol (*delta*-9-THC) of natural and synthetic origin.

Details on the origin of the substances is requested in Part four.

The present form can also be downloaded from the INCB website:
www.incb.org, under "Psychotropic Substances", Toolkit: "Form P"

The present form should be completed as soon as possible and not later than 30 June of the year following
the year to which the statistical data relate. This form should be completed and sent to:

International Narcotics Control Board
Vienna International Centre
P.O. Box 500, A-1400 Vienna, Austria
Telephone: + (43) (1) 26060-4277 Facsimile: + (43) (1) 26060-5867 or 26060-5868
Email: incb.secretariat@un.org, incb.psychotropics@un.org Home page: www.incb.org

Remarks

Instructions **(to be read carefully before completing the form)**

General

1. All psychotropic substances under international control are listed in the annex to the annual statistical report ("Green List"), which is distributed to Governments annually by the International Narcotics Control Board (INCB).
2. This form is divided into four parts:
 - Part one. Statistical data on the manufacture, utilization, stocks, imports, exports and consumption of substances in Schedules I, II, III and IV of the 1971 Convention and their salts;
 - Part two. Trade details: statistical data on imports and exports of substances in Schedules I, II, III and IV of the 1971 Convention;
 - Part three. Statistical data on the use of substances in Schedules I, II, III and IV of the 1971 Convention for the manufacture of other psychotropic substances;
 - Part four. Statistical data related to the origin of THC and its isomers and *delta*-9-THC.
3. In order to ensure the accurate completion of the form, it should be borne in mind that the terms used have the same meanings as those given in article 1 of the Convention on Psychotropic Substances of 1971, for example:
 - (a) "Export" and "import" mean in their respective connotations the physical transfer of a psychotropic substance from one State to another State;
 - (b) "Manufacture" means all processes by which psychotropic substances may be obtained, and includes refining as well as the transformation of psychotropic substances into other psychotropic substances. The term also includes the making of preparations other than those made on prescription in pharmacies;
 - (c) "Psychotropic substance" means any substance, natural or synthetic, or any natural material in Schedule I, II, III or IV of the Convention. The schedules are amended from time to time according to a procedure established in article 2 of the Convention;
 - (d) "Region" means any part of a State that, pursuant to article 28, is treated as a separate entity for the purposes of the Convention. The term "region" corresponds to the term "territory" used in the other statistical forms of INCB;
 - (e) "Schedule I", "Schedule II", "Schedule III" and "Schedule IV" mean the correspondingly numbered lists of psychotropic substances annexed to the Convention, as altered in accordance with article 2.
4. The statistical data entered on the form should be expressed in terms of the pure anhydrous base of each psychotropic substance contained in salts and preparations, excluding the weight of any non-psychotropic substance that may be combined or mixed with it. The weight should be reported in kilograms for psychotropic substances listed in Schedules I, II, III and IV. A table of the conversion factors needed to convert quantities of psychotropic substances in salt form into quantities of pure anhydrous base content is provided in part two of the "Green List".
5. In the case of preparations containing two or more psychotropic substances, data relating to each substance should be entered separately.

Remarks

6. In the space provided for remarks on page 2, the reporting authority may communicate to INCB any information facilitating the proper understanding of the reported statistical data. Such information may, for example, refer to a substance that was put under international control only during the year to which the report relates, in which case the reporting authority may wish to inform INCB that statistical data relating to that substance cover only the period following the date on which the inclusion of the substance in the relevant schedule of the 1971 Convention became fully effective (see article 2 of the Convention) and not the whole calendar year. Other information such as losses in the manufacturing process or seizures of psychotropic substances may also be reported under "Remarks".

PLEASE ENTER ALL DATA IN UNITS OF KILOGRAMS

Part one. Statistical data on the manufacture, utilization, stocks, imports, exports and consumption of substances in Schedules I, II, III and IV of the 1971 Convention and their salts

Column 1 (Substance)

7. The psychotropic substances are referred to either by their international non-proprietary names (INN) or by the other non-proprietary or trivial names indicated in the schedules of the 1971 Convention. The chemical name of each psychotropic substance may also be found in the schedules or in part one of the "Green List".

Column 2 (Quantity manufactured)

8. For each psychotropic substance, the reporting authority should indicate the total quantity manufactured domestically between 1 January and 31 December of the year to which the statistical data relate. The quantities of psychotropic substances used for the preparation of pharmaceutical dosage forms should not be included under column 2 (Quantity manufactured). However, in the case of a continuous manufacturing process that does not go through the intermediate stage of the manufacture of psychotropic substances in bulk form, but uses non-psychotropic starting material and directly leads to the final preparations containing psychotropic substances, the data on quantities manufactured under column 2 should include the quantities of the psychotropic substances contained in the manufactured preparations.

9. For tetrahydrocannabinol (THC) and its isomers and *delta*-9-tetrahydrocannabinol (*delta*-9-THC), the reporting authority should indicate an aggregate figure of the total quantity of pure anhydrous base of THC and its isomers and *delta*-9-THC, of natural and synthetic origin, manufactured and obtained (extracted) from cannabis.

Column 3 (Quantity used for the manufacture of non-psychotropic substances or products)

10. For each psychotropic substance listed in Schedules II, III and IV, the reporting authority should indicate the quantity used for the manufacture of non-psychotropic substances or products (permitted under article 4, paragraph (b), of the 1971 Convention). That quantity should include the total amount placed in the manufacturing process during the year to which the statistical data relate, even if the manufacturing process was not completed by the end of that year. Not applicable for substances in Schedule I.

Column 4 (Quantity used for the manufacture of preparations exempted under article 3, paragraphs 2 and 3)

11. For each psychotropic substance listed in Schedules II and III, the reporting authority should indicate the total quantity used for manufacture of preparations exempted from certain measures of control (permitted under article 3, paragraphs 2 and 3, of the 1971 Convention). That quantity should include the total amount placed in the manufacturing process during the year to which the statistical data relate, even if the manufacturing process was not completed by the end of that year. The quantities reported with respect to substances in Schedule II and III should be expressed in kilograms. Figures for psychotropic substances in Schedule IV may also be reported (in kilograms). Not applicable for substances in Schedule I.

Column 5 (Manufacturers' stocks as at 31 December)

12. For each psychotropic substance listed in Schedules I, II, III and IV, the reporting authority should indicate the quantity held in stock by manufacturers on 31 December of the year to which the statistical data relate in kilograms.

Columns 6 (Imports) and 7 (Exports)

13. Statistical data should be based, to the extent possible, on actual movements across borders.

14. For each psychotropic substance listed in Schedules I and II, the reporting authority should indicate (in kilograms) the total quantity imported in column 6 and the total quantity exported in column 7; these quantities must be detailed by country or region of origin in section V and by country or region of destination in section VI.

15. For each psychotropic substance listed in Schedules III and IV, the reporting authority should indicate (in kilograms) the total quantity imported in column 6 and the total quantity exported in column 7. Pursuant to Economic and Social Council resolution 1985/15 of 28 May 1985, the quantities reported in column 6 may be detailed by country or region of origin in section VII, entitled "Trade details: import of substances in Schedules III and IV, by country or region of origin", and the quantities reported in column 7 may be detailed by country or region of destination in section VIII, entitled "Trade details: export of substances in Schedules III and IV, by country or region of destination".

16. For tetrahydrocannabinol (THC) and its isomers and *delta*-9-tetrahydrocannabinol (*delta*-9-THC), the reporting authority should indicate an aggregate figure of the total quantity of pure anhydrous base of THC and its isomers and *delta*-9-THC, of natural and synthetic origin, imported and/or exported.

PLEASE ENTER ALL DATA IN UNITS OF KILOGRAMS

Column 8 (Consumption)

17. Pursuant to Commission on Narcotic Drugs resolution 54/6, for each psychotropic substance listed in Schedules I, II, III and IV, the reporting authority should indicate (in kilograms) the quantity consumed during the year in question, i.e., supplied to any person or enterprise for retail distribution, medical use or scientific research.

18. For tetrahydrocannabinol (THC) and its isomers and *delta*-9-tetrahydrocannabinol (*delta*-9-THC), the reporting authority should indicate an aggregate figure of the total quantity of pure anhydrous base of THC and its isomers and *delta*-9-THC, of natural and synthetic origin, consumed per year.

Part two. Trade details: statistical data on imports and exports of substances in Schedules I, II, III and IV of the 1971 Convention

19. The term “import”, as used in the 1971 Convention, is intended to include, as far as possible, the entrance of goods from abroad into a bonded warehouse, free port or free zone; similarly, the term “export” is intended to include the dispatch of goods abroad from a bonded warehouse, free port or free zone, although such transactions may not be treated by the national customs laws as imports and exports. However, care should be taken to ensure that goods passing through customs from a bonded warehouse, free port or free zone into the country or region itself are not recorded as imports, and that goods transferred from the country or region itself into a bonded warehouse, free port or free zone situated in the country or region are not recorded as exports. However, if a consignment passes in transit through a country or region to another country, it should not be considered by the country or region through which it passes as an import and subsequent export, even if the consignment is placed temporarily in a bonded warehouse, free port or free zone.

20. Goods returned by a country or region, for any reason whatsoever, to the original exporting country or region shall be entered as an export by the former and as an import by the latter.

21. In section V, entitled “Trade details: import of substances in Schedules I and II, by country or region of origin”, for each substance listed in Schedules I and II, indicate the name of the substance, the total quantity imported as reported in column 6 (in kilograms) in sections I and II and, under “Imported from”, the name of the exporting country or region.

22. In section VI, entitled “Trade details: export of substances in Schedules I and II, by country or region of destination”, for each of the substances reported in Schedules I and II, indicate the name of the substance, the total quantity exported as reported in column 7 (in kilograms) in sections I and II and, under “Exported to”, the name of the importing country or region.

23. In section VII, entitled “Trade details: import of substances in Schedules III and IV, by country or region of origin”, pursuant to Economic and Social Council resolution 1985/15 of 28 May 1985, for each of the substances reported in Schedules III and IV, indicate the name of the substance, the total quantity imported as reported in column 6 (in kilograms) in sections III and IV and, under “Imported from”, the name of the exporting country or region.

24. In section VIII, entitled “Trade details: export of substances in Schedules III and IV, by country or region of destination”, pursuant to Economic and Social Council resolution 1985/15 of 28 May 1985, for each of the substances reported in Schedules III and IV, indicate the name of the substance, the total quantity exported as reported in column 7 (in kilograms) in sections III and IV and, under “Exported to”, the name of the importing country or region.

25. Trade details related to THC and its isomers and *delta*-9-THC should include quantities of natural and synthetic origin.

Part three. Statistical data on the use of substances in Schedules I, II, III and IV of the 1971 Convention for the manufacture of other psychotropic substances

26. Countries and territories are requested to provide information, on a voluntary basis, on the use of psychotropic substances listed in Schedules I, II, III and IV for the manufacture of other psychotropic substances, indicating the name of the source substance, the quantity used in the manufacturing process, the name of the other psychotropic substance derived from the manufacturing process and the quantity of that substance derived from the manufacturing process.

Part four. Statistical data related to the origin of THC and its isomers and *delta*-9-THC

27. Countries and territories are requested to provide details on the manufacture and manufacturers stocks of THC and its isomers and *delta*-9-THC of natural and synthetic origin separately. Quantity of THC and its isomers and of *delta*-9-THC obtained from cannabis (natural origin) are also to be reported on Form C – Annual Statistics of Production, Manufacture, Consumption, Stocks and Seizures of Narcotic Drugs. Governments are invited to provide, on a voluntary basis, details on trade and consumption of THC and its isomers and *delta*-9-THC of natural and synthetic origin separately.

Part one. Statistical data on the manufacture, utilization, stocks, imports, exports and consumption of substances in Schedules I, II, III and IV of the 1971 Convention and/or their salts
